A MOWER AND THE LIGHTING LAW.

TO THE EDITOR OF THE IRISH TIMES.

SIR,—A novel case was brought before the magistrates at Petty Sensions—vix, that of a vehicle without light after the prescribed hour, a mower. The defondant was moving this mower after a day's work to another field, so as to be ready for work carly next morning. His defence was that he could not attach a light to the mower, I have examined a nower with my steward, and find that a light attached to the turned-up knife would be hidden by the off borse, in any other position it would be even less visible. Mowers are frequently left-handed: a wrong position of light would render than the country of the case of the country of the case of the country of the case of the vehicle travelling after that, It may be jointly owned by some farmers, or hinch in each case time is walushle.

One of the treats of each year is now here. Don't miss it. The packets of White's Wafer Oatmeal now contain it—the freshly harvested and newly milled oats of 1917.

The damp-proof flavour-retaining packets which contain White's Wafer Oatmeal ensure perfection of flavour always. The rich nutty flavour for which Ireland's premier oatmeal is famed is very conspicuous in New Crop.

Breakfast is a treat these autumn days in Ireland—for the porridge eater. There are no oats like primest Irish oats fresh from the fields. All that can improve them they now have, viz.: White's splepdid milling.

Plentiful Supplies of Water.

HYDRAULIC-NO FUEL, NO LABOUR. Why carry or Pump Water? The "Willis" Improved Hydraulic Ram is simple, self-acting, yet effective, and quite an inexpensive apparatus which guarantees an ample supply of water from River, Stream, or overflow Spring to the Home, Outhouses, or Fields within a very large area. This apparatus has time and again demonstrated its great utility under abnormal and difficult conditions. It is at work in many places in Ireland hitherts considered impracticable to permit of operations by Hydraulic Action. Everyone interested should write for particulars to-day.

WATER DIVINING. We advise on water schemes and locatesprings, guarantee results, and contract for all plumbing work. If there are no supplies of water we will send our Water Diviner, who will locate underground springs. Water supply guaranteed. No results, no pay. We will be you see the water before we see your money. We run no risks, as our Water Diviner never tails if there is any water under your land. Our fee for Water Divining only (for clients whe desire to sink wells for themselves) is £2 2s. Od. and travelling expenses.
